Hyderabad | +919652273540|varshikakaringula26@gmail.com|www.linkedin.com/in/varshika26

Professional Summary: Self-motivated Computer Science undergraduate specializing in Data Science with a strong foundation in software development, data structures, and algorithms. Proficient in Python, and SQL with hands-on experience in academic projects involving data analysis, web development, and AI-based solutions. Seeking an entry-level Software Engineer or Data Analyst role to apply problem-solving skills in a collaborative environment.

EDUCATION

Swami Vivekananda Institute of Technology	Bachelor of Engineering in Computer Science (Data Science)	Nov 2022-May 2026 CGPA:(7.5/10)
Narayana Junior College	Intermediate	Aug 2020-May 2022
St. Ann's High School	Secondary School Certificate	June 2020

PROJECTS

Data-Driven Retail Pricing Optimization:

- Built a machine learning-based retail pricing optimization model using regression techniques to predict optimal product prices from historical sales, customer behavior, and market trends.
- Performed data preprocessing, feature engineering, and exploratory data analysis (EDA) to improve data quality and model performance.
- Evaluated regression models (Linear Regression, Random Forest, and XGBoost) using RMSE, MAE, and R^2 , and applied SHAP for model explainability and feature importance analysis.
- Created interactive Power BI/Tableau dashboards to visualize pricing insights and support data-driven pricing decisions and revenue optimization.

Customer Churn Prediction

- Designed and implemented a customer churn prediction model using Python and Scikit-learn to identify customers likely to discontinue services based on demographic, financial, and behavioral attributes.
- Performed data cleaning, feature engineering, and exploratory data analysis (EDA) using Pandas, NumPy, Matplotlib, and Seaborn to uncover churn patterns and improve model performance.
- Trained and optimized classification models including Logistic Regression, Decision Tree, and Random Forest, evaluating performance using Accuracy, Precision, Recall, F1-score, and ROC-AUC.
- Delivered actionable insights by identifying key factors influencing customer churn, enabling data-driven customer retention strategies and improved business decision-making.

TECHNICAL SKILLS

- Programming Languages:** Python, SQL
- Data Analysis:** Pandas, NumPy, Data Cleaning, Data Preprocessing, Exploratory Data Analysis (EDA)
- Visualization:** Power BI, Tableau, Matplotlib, Seaborn, Excel
- Database:** MySQL
- Machine Learning & Data Science:** Regression Models, Predictive Modeling, Customer Churn Prediction, Model Evaluation
