PROFESSIONAL SUMMARY

Computer Science undergraduate specializing in Data Science, with hands-on project experience in Python, SQL, and machine learning for data analysis and predictive modeling. Skilled in data cleaning, exploratory data analysis (EDA), statistical modeling, and building interactive dashboards in Power BI and Tableau to turn raw data into actionable business insights. Seeking an entry-level Data Analyst / Data Analytics role to apply analytical and problem-solving skills in a collaborative, data-driven environment.

TECHNICAL SKILLS

Programming Languages: Python, SQL

Data Analysis: Pandas, NumPy, Data Cleaning, Data Preprocessing, Exploratory Data Analysis (EDA)

Data Visualization: Power BI, Tableau, Matplotlib, Seaborn, Excel

Databases: MySQL

Machine Learning & AI: Regression Models, Classification Models, Predictive Modeling, Model Evaluation, Customer Churn Prediction

PROJECTS

Data-Driven Retail Pricing Optimization

- Built a machine learning-based pricing optimization model using regression techniques to predict optimal product prices from historical sales, customer behavior, and market trend data.
- Performed data preprocessing, feature engineering, and exploratory data analysis (EDA) in Python to improve data quality and model performance.
- Evaluated and compared Linear Regression, Random Forest, and XGBoost models using RMSE, MAE, and R^2 ; applied SHAP for model explainability and feature importance analysis.
- Designed interactive Power BI/Tableau dashboards to visualize pricing insights and support data-driven pricing and revenue-optimization decisions.

Customer Churn Prediction

- Designed and implemented a customer churn prediction model using Python and Scikit-learn to identify customers likely to discontinue services, based on demographic, financial, and behavioral attributes.
- Performed data cleaning, feature engineering, and EDA using Pandas, NumPy, Matplotlib, and Seaborn to uncover key churn patterns and improve model performance.
- Trained and optimized Logistic Regression, Decision Tree, and Random Forest classifiers, evaluating performance using Accuracy, Precision, Recall, F1-score, and ROC-AUC.
- Delivered actionable insights on key churn drivers, supporting data-driven customer retention strategies and business decision-making.

EDUCATION

Swami Vivekananda Institute of Technology

Bachelor of Engineering in Computer Science (Data Science) — CGPA: 7.5/10

Nov 2022 – May 2026

Narayana Junior College

Intermediate

Aug 2020 – May 2022

St. Ann's High School

Secondary School Certificate

June 2020

CERTIFICATIONS

- Python Bootcamp — Lets Upgrade EdTech Pvt. Ltd. (May 2025)
- Artificial Intelligence Fundamentals — IBM SkillsBuild (August 2025)
- Customer Engagement: Problem Solving and Process Controls — IBM SkillsBuild (August 2025)
- Customer Engagement: Communication and Personality Dynamics — IBM SkillsBuild (August 2025)
